BRIEF BIOGRAPHY

My work bridges computer architecture and software systems, demonstrating the importance of that bridge in enabling sustainable data center systems via solutions that span the compute stack.

As the demand for web services continues to grow, data centers are scaling up to meet the demand, consuming a massive amount of energy and producing significant carbon emissions. **My research focuses on addressing the growing carbon emissions, produced both by running and manufacturing hardware, of data centers by analyzing inefficiencies across computer architecture and software systems and designing solutions to make these systems more energy and carbon efficient.**

My work is one of the first to examine the environmental impact of hyperscale web systems and to provide actionable insights to reduce it. My work integrates carbon efficiency into computer system design, as it is crucial for sustainable growth and access to critical web services in both developed and developing nations. My work is a step towards curbing computing's contributions towards climate change and promoting sustainable computing practices.

My research has been recognized with the 2023 Benjamin Garver Lamme/Westinghouse Graduate Fellowship and the 2022 Carnegie Institute of Technology Dean's Fellowship.

EDUCATION

Ph.D., Electrical and Computer Engineering — *Carnegie Mellon University*
Advisor: Prof. Akshitha Sriraman — *Aug 2022 - Present*
GPA: 4.0 out of 4.0; *Benjamin Garver Lamme/Westinghouse Graduate Fellowship*
Dissertation Title: Enabling Sustainable Web Systems

B.Sc., Electrical Engineering — *Harvard University*
PIs: Profs. David Brooks & Gu-Yeon Wei — *Aug 2018 - May 2022*
Minor in Computer Science
GPA: 4.0 out of 4.0; *Member of Phi Beta Kappa*

AWARDS AND HONORS

Benjamin Garver Lamme/Westinghouse Graduate Fellowship — *2023*
Full tuition support for second year of PhD

Carnegie Institute of Technology Dean's Fellow — *2022*
Awarded $83,000 towards tuition, stipend, and travel

Harvard SEAS Dean's Engineering Design Award — *2022*
Awarded $500 for having one of the top 7 (out of 43) best Senior engineering design projects

Sophia Freund Prize — *2022*
Awarded $1000 as highest ranking undergraduate in the Electrical Engineering department

Phi Beta Kappa Member — *2022*
Admitted into Harvard's chapter, one of 146 out of 1962 (7.4%) students

Derek Bok Center Distinction in Teaching — *2020, 2021*
Awarded to most highly rated (by students) TAs; received distinction in three semesters

John Harvard Scholar — *2020*
Award given to top 5% (4.0 GPA) of students in respective class

Harvard College Research Program Funding Recipient — *2019*
Awarded $3,500 to perform independent research during the summer

Detur Prize Winner — *2019*
Recognizes students with top academic standing in their first year at Harvard

PEER-REVIEWED WORKSHOP PUBLICATIONS & POSTERS

- **Jaylen Wang**, Udit Gupta, and Akshitha Sriraman. *Characterizing Datacenter Server Generations for Lifetime Extension and Carbon Reduction.* 1st Workshop on NetZero Carbon Computing (**NetZero 2023**) held in conjunction with **HPCA**. Feb 2023.

  Performs the first ever characterization of server generations for microservice-based web services to enable hardware lifetime extension

- Sahana Rangarajan, **Jaylen Wang**, Sara Mahdizadeh Shahri, Pratyush Patel, and Akshitha Sriraman. *Designing Equitable Data Center Scheduling Systems.* Career Workshop for Inclusion and Diversity in Computer Architecture (**CWIDCA 2022**) held in conjunction with **MICRO**. Oct 2022. [link]

  Introduces equity as a first-order design metric in modern data center scheduling systems

- **Jaylen Wang**, Abdulrahman Mahmoud, Gu-Yeon Wei, and David Brooks. *A Dataflow-Aware Fault Resilience Analysis Framework for Deep Neural Network Accelerators.* Young Architect Workshop (**YArch 2021**) held in conjunction with **ASPLOS**. March 2022. [link]

  Introduces a new framework and tool to quickly and accurately assess the reliability of deep neural network accelerator designs to random bit flips, providing insights for resilient accelerator design

PROFESSIONAL EXPERIENCE

Graduate Research Assistant, Carnegie Mellon University *Aug 2022 - Present*
Advisor: Prof. Akshitha Sriraman

Introducing sustainability as a first-order hardware/software system design metric for hyperscale systems and redesigning data center systems to promote hardware reuse

Undergraduate Research Assistant, Harvard University *March 2021 - Aug 2022*
Lab: Harvard Architecture, Circuits, and Compilers Group
Advisors: Dr. Abdulrahman Mahmoud, Profs. Gu-Yeon Wei and David Brooks

Developing a hardware-aware framework for analyzing the resilience of deep neural network accelerators to soft errors, considering the reuse of values in an accelerator's dataflow propagation

Engineering Development Group Intern, MathWorks *May 2021 - Aug 2021*
Team: Deep Learning HDL Toolbox
Supervisors: Wang Chen, Siyuan Xu

Enabling efficient mapping of non-square convolution kernels onto square processing-element arrays, allowing users to deploy models using non-square kernels onto FPGAs

Undergraduate Research Assistant, Harvard University *May 2020 - Aug 2020*
Lab: Harvard Edge Computing Lab
Advisor: Prof. Vijay Janapa Reddi

Analyzing how using SLAM for localization affects efficiency and power usage within autonomous drone applications by integrating SLAM algorithms into an open-sourced drone benchmarking framework

Undergraduate Research Assistant, Harvard University *May 2019 - Aug 2019*
Lab: Hoffman Physics Lab
Advisor: Prof. Jenny Hoffman

Developing a tensioning system for an XY-walker system to extend the range of a scanning tunneling microscope used to research the proximity effect of superconductivity

TEACHING EXPERIENCE

Undergraduate Teaching Assistant, Harvard University

- Systems Programming and Machine Organization; Prof. Eddie Kohler *Fall 2020, 2021*
- Circuits, Devices, and Transduction; Profs. Gage Hills & Woodward Yang *Fall 2021*
- Systems and Control; Profs. Li Na & Yue Lu *Fall 2021*
- Introduction to Eletrical Engineering, Profs. Chris Lombardo & Marko Loncar *Spring 2021*

– Integration, Series and Differential Equations; Dr. Hakim Walker *Fall 2019*

LEADERSHIP & VOLUNTEERING

– CMU Institute of Technology K-12 Outreach, STEM Volunteer *2023*

– President of Harvard Club Tennis *2019-2022*

– President of Harvard College Engineering Society *2020-2021*

– Co-President of Harvard Engineering Peer Concentration Advisors *2020-2021*

TECHNICAL SKILLS

Programming Languages	C/C++, Python, Shell, Verilog, x86 Assembly
System Skills	Low-level Systems Programming, Performance Characterization, Scripting, Docker
Tools and Frameworks	Pin, gem5, Linux perf, Intel PMU tools, PyTorch, Catapult HLS, Git
